

Abstract

Convertible Blanket

The present invention provides a convertible blanket comprising a blanket 1 made of fabric material and a pocket 2 into which the blanket can be stowed to create a cushion or pillow. The blanket may also include a zip fastener around its edge to convert the blanket into a sleeping bag. Preferably the pocket is of a shape that provides an amusement object for a child when it is stuffed with the blanket, for example, it may resemble a stuffed animal, an object such as a crown or football, or a cartoon character.
